

Safety Padding for ADA Rails and P-rails

New state requirement on all new and existing telescopic bleacher systems

Available for all sizes and shapes of P-rails or ADA rails

Safety pad slips over ADA rail to provide an extra measure of protection in the event that a spectator or player should collide with the ADA rail. Can be customized with school colors and mascot.

Another ADA rail with a Bleacherman safety pad. Demountable pad can be left in position whether bleachers are open or closed (does not impede operation).

P-rail in open position with demountable safety pad attached. This pad is customized with the team insignia. Only the bottom P-rail requires padding.
